Office Action Summary

Art Unit 2811

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-22, drawn to a semiconductor device, classified in class 257, subclass 378.
- II. Claims 1-17, drawn to processes for making semiconductor devices, classified in class 438, subclass 584.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by processes materially different than those/that of the group II invention, for example, the "CMOS" and "bipolar" transistors could be formed at different times rather than simultaneously, and a "collector" region could be formed by impurity doped epitaxial growth rather than by ion implantation, and an "emitter" region could be formed by etching a layer rather than by depositing material in an opening in a mask.

Because these inventions are distinct for the reasons given above and, as shown by the above different classifications, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit 2811

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
